

# MANGO CROP REPORT

Updated December 21, 2017

The National Mango Board is working with organizations in the mango-producing countries to get projections of what will be shipped to the U.S. This document contains information from countries that are currently shipping or planning to ship in the near future to the U.S. and does not represent the entire year. The crop report document will be updated as we receive new information from each country. Other valuable tools include (these are links):

**The Mango Crop Report is updated regularly and can be found at [mango.org/crop](http://mango.org/crop).**

## Ecuador and Peru Crop Information

Mango volume shipped on week ending 12/16/17 was approximately 1,486,890 boxes.

- During the same week last year, volume shipped was approximately 2,057,810 boxes.

**Please note:** U.S. entry ports report incoming mango volume on different schedules; some report daily and some weekly. This will cause discrepancies between the volume shipped from the source and the volume arrived at the U.S. entry ports in any given week.

**Dates are week-ending. For Shipping Projections and Volume Shipped from Source, 2-3 weeks from Ecuador and Peru for arrival at U.S. Ports.**

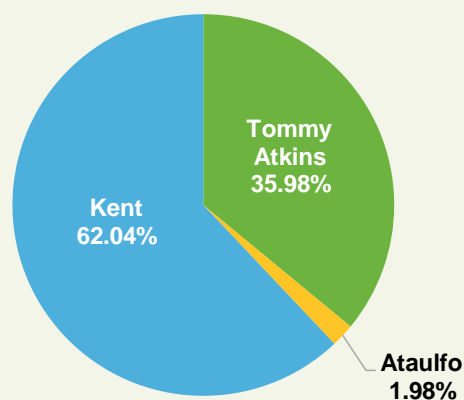

All projections will be adjusted throughout the season.
