- Q2 2017

## RETAIL SCANNER DATA

Q2 2017

## ABOUT THE N-PG DATA SET

The data is provided by Nielsen-Perishables Group (N-PG)
The data represents retail census sales data of total U.S. grocery store chains with more the $\$ 2$ million sales annually

Data is captured in a universe called the Fresh Coverage Area (FCA) and includes approximately 18,000 stores nationwide Data is collected by week, by store, by item with 117 weeks in the active database

Not included in the data set are small independent chains and alternative format retailers such as Whole Foods and Trader Joe's

The data represents fruit items sold in the produce department including UPC, PLU and system-2 coded items

## DATA PARAMETERS

Geography:
Total U.S.
Nine sub-regions
Time Period:
Monthly and quarterly, compared to the same period in the prior year
Products:
Mango sub-category, whole mango segment
Measurement:
Volume is measured in units, one mango = one unit

## EXECUTVE SUMMARY

Mixed results for Q2
$3 \%$ decline in volume per store per week for all of Q2
24\% increase in volume per store per week in April 2017
No change in volume per store per week in May 2017
$16 \%$ decline in volume per store per week in June 2017
Average retail price decreased 5\% in Q1
Regional highlights
Volume per store per week decreased in five sub-regions in Q2, and increased in four

Q2 increases were observed in the Mid Atlantic(+8\%), New England (+5\%), Pacific (+4\%) and South Atlantic(+3\%) sub-regions
All comparisons are to the same period on the prior year

AD TRACKING DATA

## AD TRACKING

 METHODOLOCYData is pulled from the USDA-AMS Market News portal retail report The USDA Retail Report is based on a weekly survey of 500 retailers comprising more than 29,000 individual stores with online weekly advertised features

The information represents advertised prices at major retail supermarket outlets

Ad frequency follows a seasonal curve and responds to market and volume variations

Usually, when we see a big difference in the year to year ad frequency trend, it can be related directly to mango volume and price at that time

Advertising decisions are made weeks or even months in advance, so good crop information is critical

## EXECUTIVE SUMMARY

All comparisons are to the same period in prior year
55\% increase in stores on ad in April 2017
13\% increase in stores on ad in May 2017
$3 \%$ decline in stores on ad in June 2017
15\% increase in stores on ad for Q2 2017
$20 \%$ increase in stores on ad from January to June 2017
