

Mango Crop Report

Updated May 18, 2012

The National Mango Board is working with organizations in the mango-producing countries to get projections of what will be shipped to the U.S. This document contains information from the countries currently shipping or planning to ship in the near future to the United States and does not represent the entire year. The crop report document will be updated as we receive new information from each country. Other valuable tools include (these are links):

Mango Crop Report Updated May 18, 2012 - Page 2

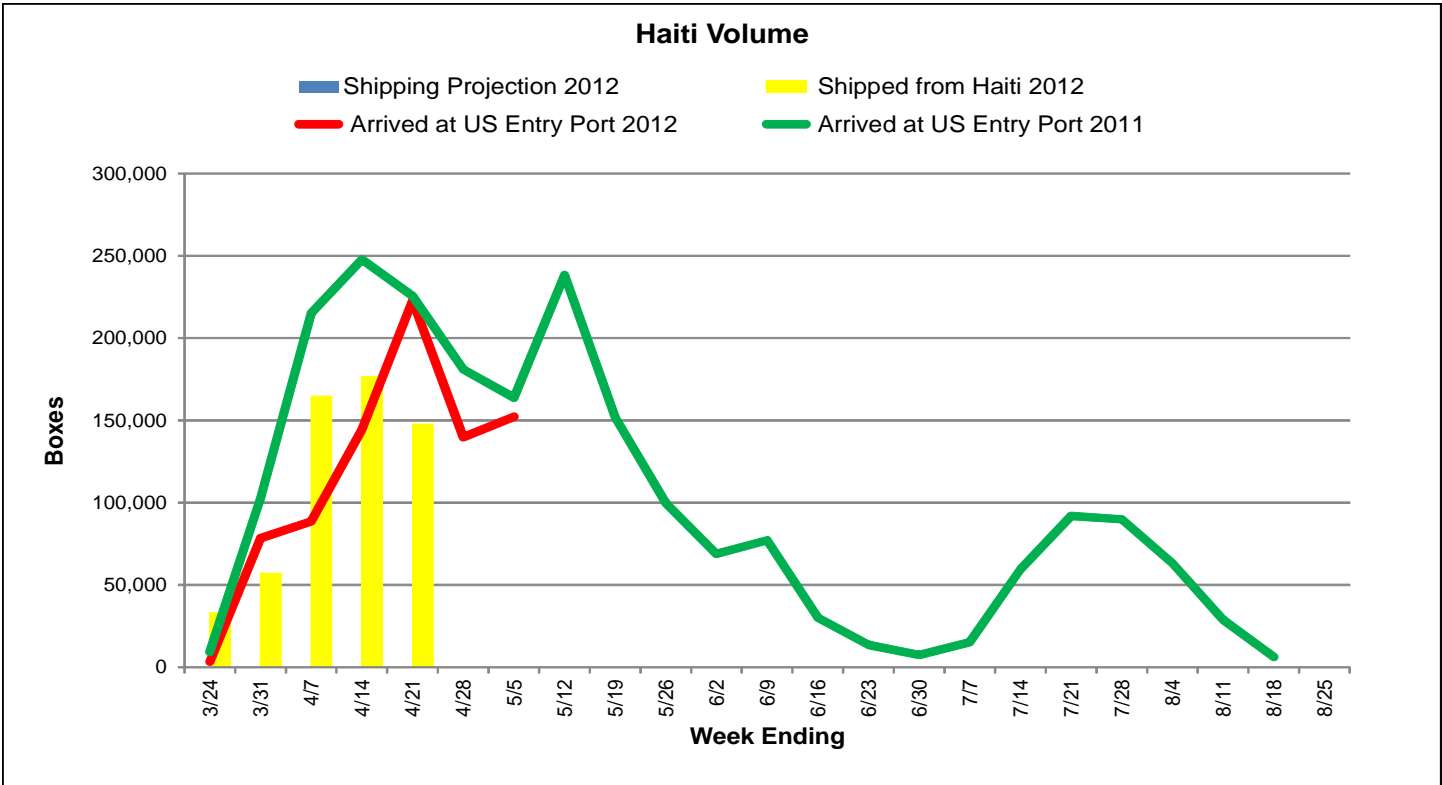

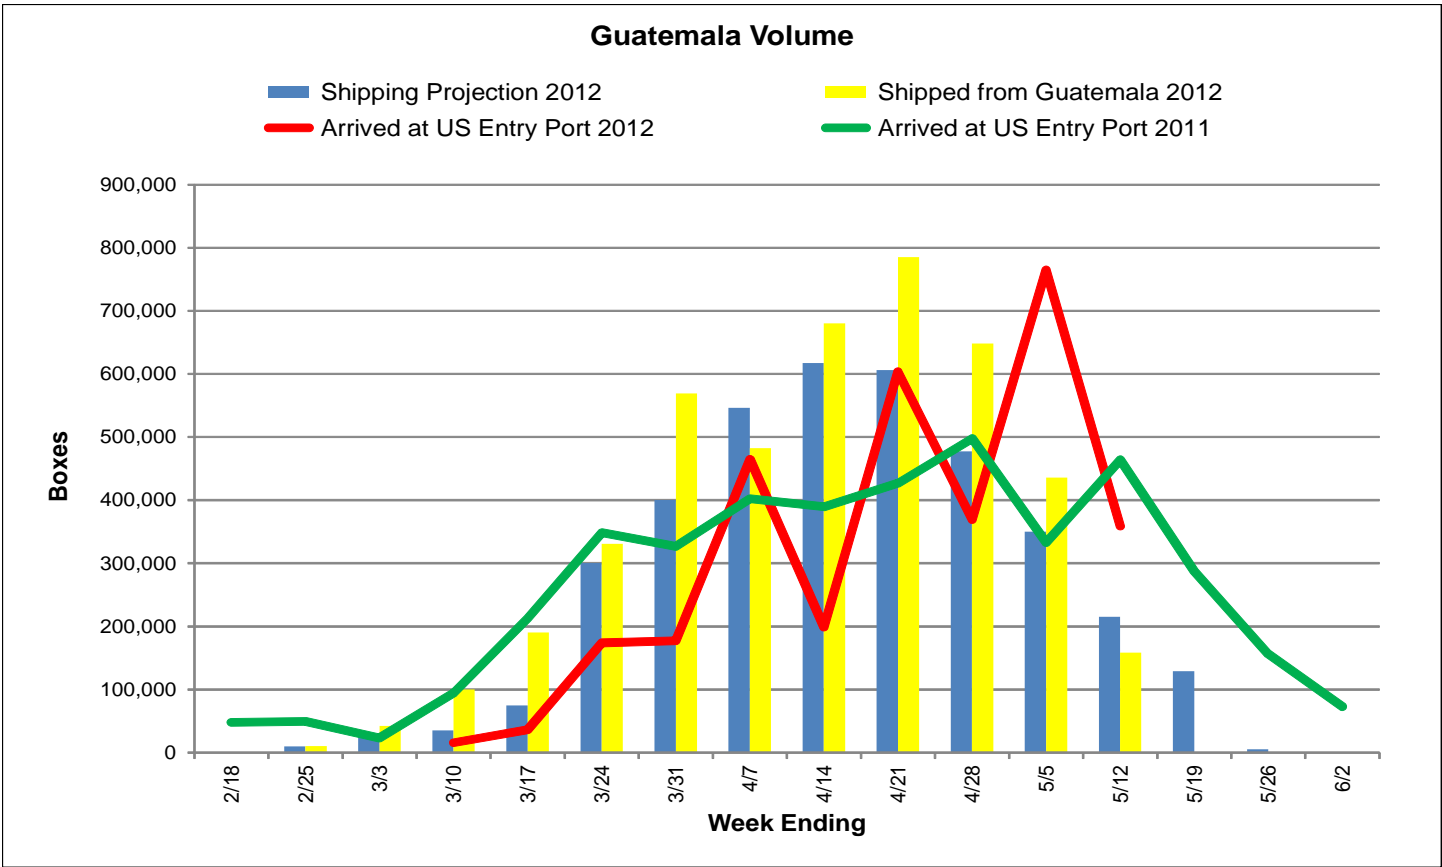

See pages 5 for data table and sources.

Please note: U.S. entry ports report incoming mango volume on different schedules. Some report daily, some weekly and a few report all the volume for an entire month at one time. This will cause discrepancies between the volume shipped from the source and the volume arrived at the U.S. entry ports in any given week.

Please note: Dates are week-ending. For Shipping Projections and Volume Shipped from Source, allow 3-5 days from Mexico and Haiti and 5-7 days from Guatemala for arrival at U.S. Ports.
