

MANGO CROP REPORT

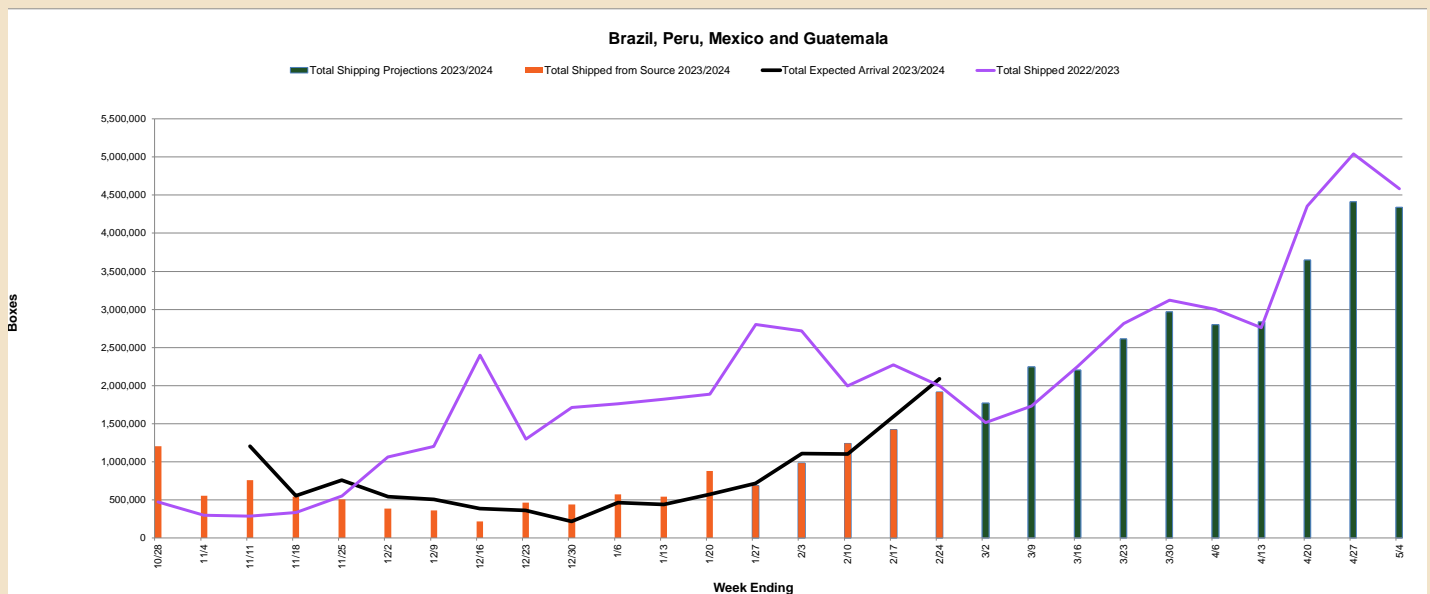

Updated March 1, 2024

Please refresh your browser to upload the most current report

The National Mango Board (NMB) publishes the Mango Crop Report on a regular basis using information from industry organizations and other sources in an effort to provide the best available information on shipment projections, actual arrivals, variety and size availability, and other figures considered useful to the U.S. mango market. Although this information is updated regularly, changes can occur due to numerous factors at any given moment in time. Accordingly, the Mango Crop Report should only be used as a guide.

SUMMARY: Brazil, Peru, Mexico and Guatemala

- ♦ **EXPORTING REGIONS:** Brazil ended its season. Peru, Mexico and Guatemala are currently harvesting and/or packing. See pages 3-5, 6-8, 9-10 and 11-12 respectively for more details.
- ♦ **VARIETIES:** There are currently TWO main mango varieties shipped to the US market: Ataulfo/Honey (45%) and Tommy Atkins (38%). There are also limited supply of Kent and Edward. See page 2.
- ♦ **SIZING:** (Ataulfo/Honey: Large = size 16 and larger, Small = size 18 and smaller. Round mangos: Extra Large = 7 and larger, Large = sizes 8 and 10, Small = 12 and smaller.)
- ♦ **RECENT VOLUMES:** Total mango volume shipped on week ending 02/24/2024 was approximately 1,919,242 boxes.
 - ◇ **Brazil:** Volume shipped was approximately 72,800 boxes for a total of 12,342,943 boxes for the season
 - ◇ **Peru:** Volume shipped was approximately 370,369 boxes for a total of 5,688,216 boxes for the season.
 - ◇ **Mexico:** Volume shipped was approximately 1,468,688 boxes for a total of 3,801,456 boxes for the season.
 - ◇ **Guatemala:** Volume shipped was approximately 7,385 boxes for a total of 7,385 boxes for the season.
- ♦ **FUTURE VOLUMES:** Overall mango volume shipped from week 09 (03/02/2024) to week 16 (04/20/2024) is expected to be about 2% lower YOY, with arrivals expected from week 10 to 17. The 2023/2024 Brazilian season is expected to be about 31% higher YOY. The 2023/2024 Peruvian season is expected to be about 73% lower YOY. The 2024 Mexican season (up to week 18-05/04/2024) is expected to be about 1% lower YOY. The 2024 Guatemalan season is expected to be about 6% lower YOY. See page 2 for total and weekly volumes and pages 4, 7, 10 and 12 for individual country volume.

Please note: U.S. entry ports report incoming volume on different schedules; some report daily and some weekly. This causes discrepancies between the volume shipped from the source and the volume arrived at the U.S. entry ports in any given week.

Projections are adjusted throughout the season as new information is received.

Crop Report Tools and Resources

The Mango Crop Report is updated weekly and can be found at mango.org/crop

Note: the National Mango Board is working with organizations in the mango-producing countries to get projections of what will be shipped to the U.S. This document contains information from countries that are currently shipping or planning to ship in the near future to the U.S. and does not represent the entire year. The crop report document will be updated as we receive new information from each country. Other valuable tools include (these are links):
