

# MANGO CROP REPORT

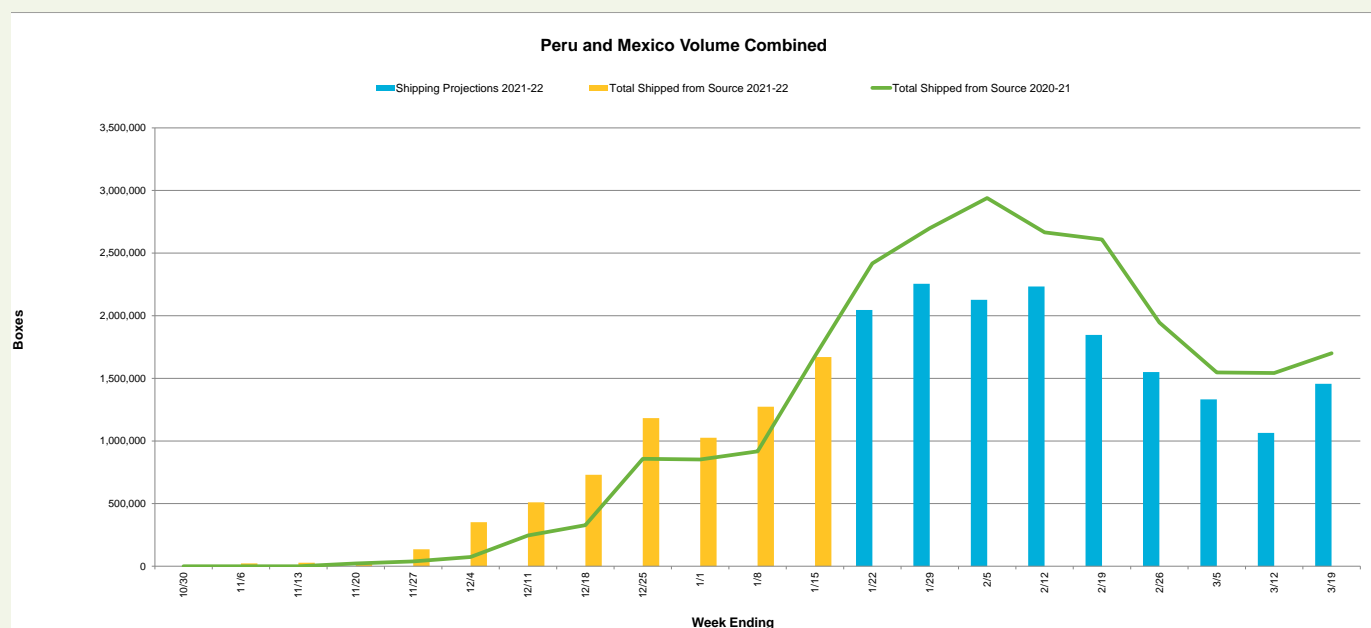

Updated January 21, 2022

Please refresh your browser to upload the most current report

The National Mango Board (NMB) publishes the Mango Crop Report on a regular basis using information from industry organizations and other sources in an effort to provide the best available information on shipment projections, actual arrivals, variety and size availability, and other figures considered useful to the U.S. mango market. Although this information is updated regularly, changes can occur due to numerous factors at any given moment in time. Accordingly, the Mango Crop Report should only be used as a guide.

## SUMMARY: Peru and Mexico

- **EXPORTING REGIONS:** Peru and Mexico are currently harvesting and packing. See pages 3-5 and 6-7 respectively, for more details on each country.
- **VARIETIES:** There is currently ONE main mango variety available in the market: Kent (96%). There are also limited supplies of Ataulfo/Honey. See pages 2, 4 and 7.
- **RECENT VOLUMES:** Total mango volume shipped on week ending 1/15/2022 was approximately 1,670,591 boxes.
  - ◇ **Peru:** Volume shipped was approximately 1,573,989 boxes for a total of 6,835,041 boxes for the season.
  - ◇ **Mexico:** Volume shipped was approximately 96,602 boxes for a total of 128,364 boxes for the season.
- **FUTURE VOLUMES:** Overall mango volume shipped from week 3 (1/22/2022) to week 10 (3/12/2022) is expected to be about 21% lower YOY, with arrivals expected from week 4 to 11. The 2021-2022 Peruvian season is projected to be about the same YOY. The 2021 Mexican season (Up to week 24—6/18/2022) is projected to be about the same YOY. See page 2 for total and weekly volumes, and pages 4, and 7 for individual country volume.

**Please note:** U.S. entry ports report incoming volume on different schedules; some report daily and some weekly. This causes discrepancies between the volume shipped from the source and the volume arrived at the U.S. entry ports in any given week.

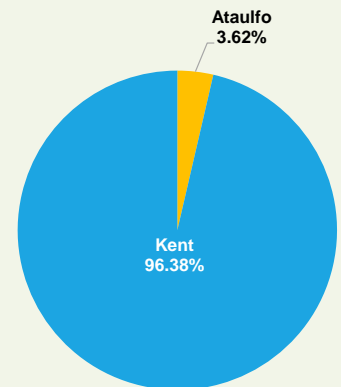

Projections are adjusted throughout the season as new information is received.

*Dates are week-ending. For Shipping Projections and Volume Shipped from Source 2-3 weeks from Peru; and 2-5 days from Mexico for arrival at U.S. Ports.*

# Peru Crop Information

- The Peruvian mango season began the last week of October (2021) and will run until the fourth week of March (2022) with a projection of approximately **17 million boxes**.

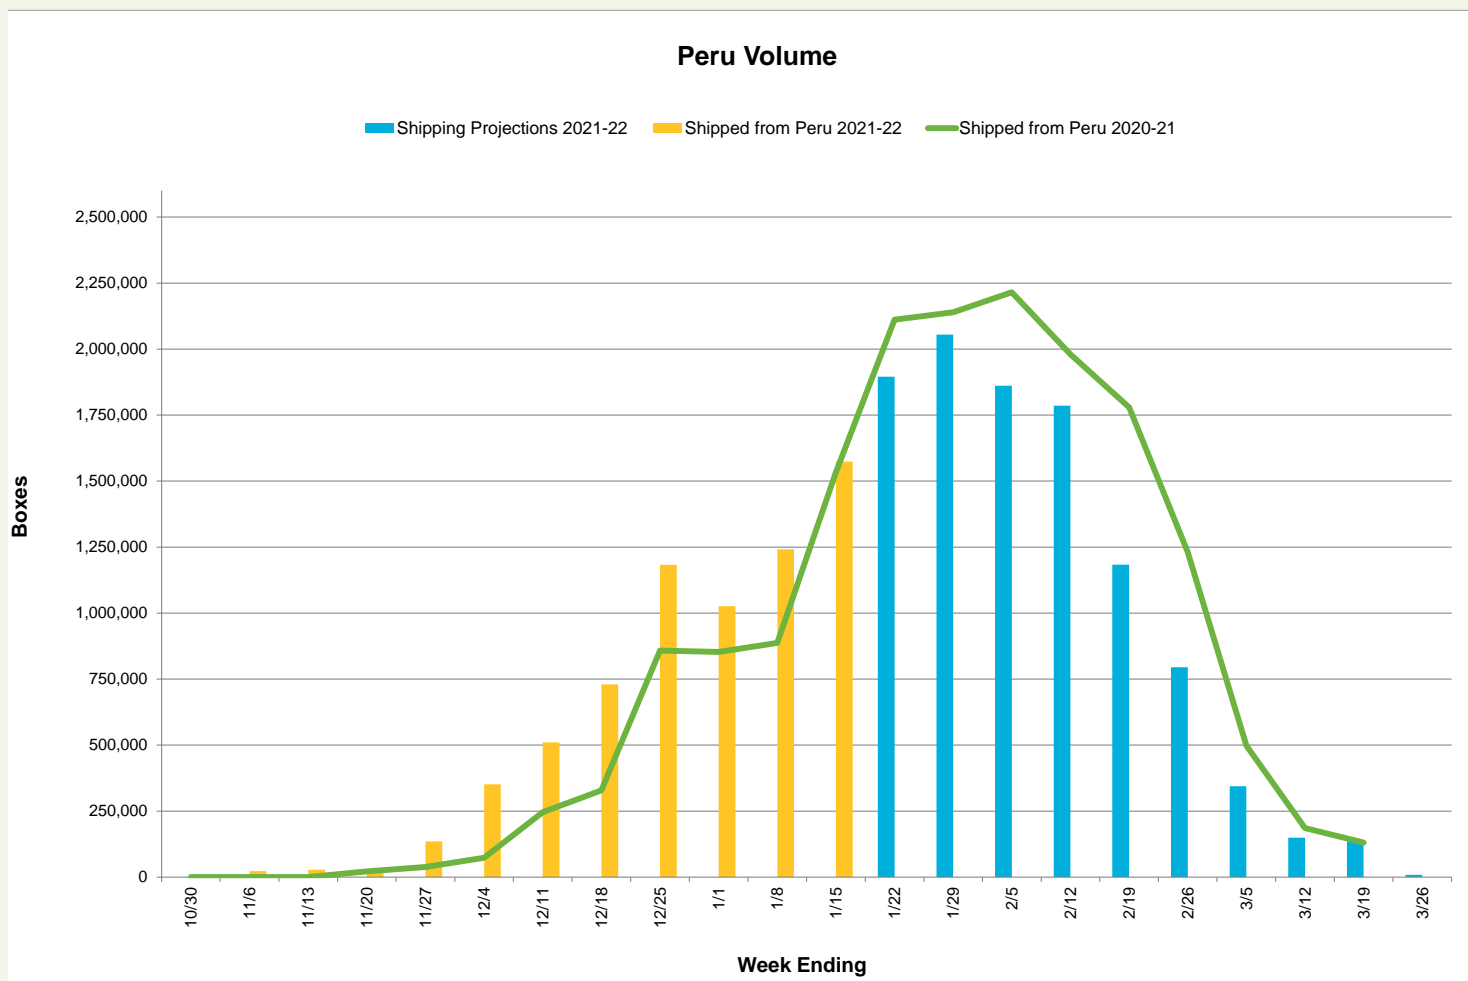

*The projections may increase depending on shipping logistics. The NMB will keep close contact with the Peruvian FMO (APEM) and communicate any change as the season progresses to the industry*

- Peru's main varieties are: Kent (98%) and Ataulfo/Honey (2%)

## Volume on week ending 1/15/2022

- Volume shipped from Peru was approximately **1,573,989** boxes for a total of **6,835,041** boxes for the season.
  - \* During the same week last year, volume shipped from Peru was 1,534,043 for a total of 4,839,737.

Price information is found on pages 8—10

# Crop Report Tools and Resources

*The Mango Crop Report is updated weekly and can be found at [mango.org/crop](http://mango.org/crop).*

Note: the National Mango Board is working with organizations in the mango-producing countries to get projections of what will be shipped to the U.S. This document contains information from countries that are currently shipping or planning to ship in the near future to the U.S. and does not represent the entire year. The crop report document will be updated as we receive new information from each country. Other valuable tools include (these are links):
