

# MANGO CROP REPORT

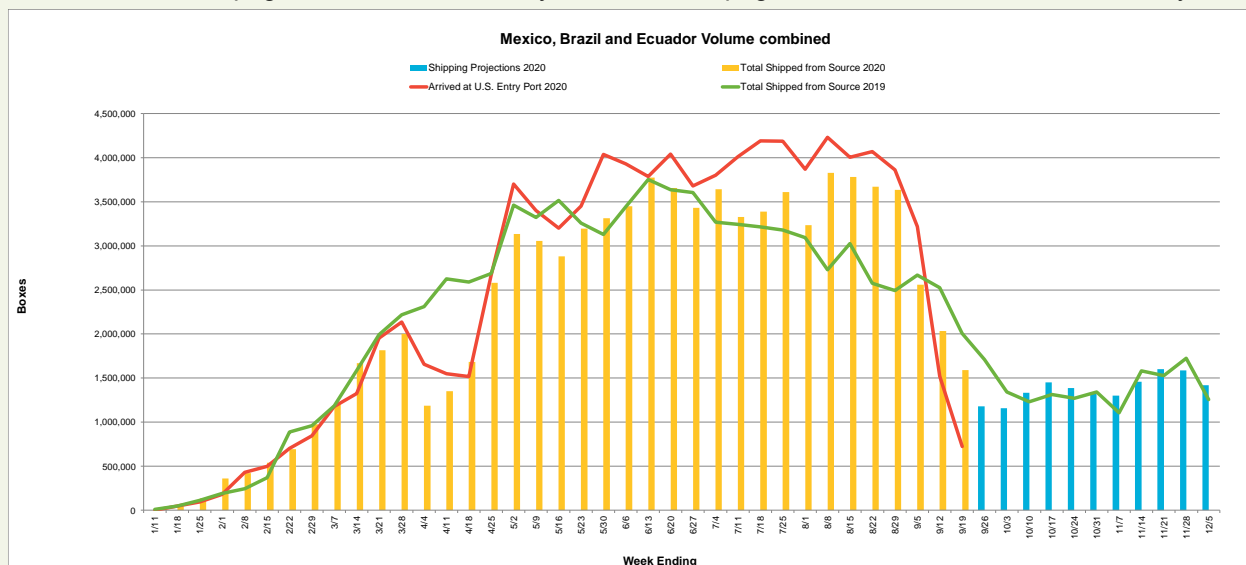

Updated September 25, 2020

Please refresh your browser to upload the most current report

The National Mango Board (NMB) publishes the Mango Crop Report on a regular basis using information from industry organizations and other sources in an effort to provide the best available information on shipment projections, actual arrivals, variety and size availability, and other figures considered useful to the U.S. mango market. Although this information is updated regularly, changes can occur due to numerous factors at any given moment in time. Accordingly, the Mango Crop Report should only be used as a guide.

## SUMMARY: Mexico, Brazil and Ecuador

- **EXPORTING REGIONS:** **Mexico** (South Sinaloa, Jalisco and North Sinaloa), **Brazil** and **Ecuador** are currently harvesting and packing. See pages 3-5, 6-8, and 9-11 respectively for more detail on each country.
- **VARIETIES:** There are currently TWO main mango varieties available in the market: Tommy Atkins (63%) and Keitt (32%). There are also limited supplies of Ataulfo/Honey, Palmer and Kent. See pages 2, 4, 7 and 10.
- **SIZING:** (Ataulfo/Honey: Large = size 16 and larger, Small = size 18 and smaller. Round mangos: Extra Large = 7 and larger, Large = sizes 8 and 10, Small = 12 and smaller.)
  - **Mexico (North Sinaloa):** 66% of Keitt are Extra Large, 32% are Large and 2% are Small. See table on page 5.
  - **Ecuador:** 25% of Ataulfo/Honey are Large and 75% are Small; 100% of Keitt are Small. See table on page 11
- **RECENT VOLUMES:** Total mango volume shipped on week ending **9/19/2020** was approximately **1,591,813 boxes**.
  - ◇ **Mexico:** Volume shipped was approximately 500,551 boxes for a total of 78,101,320 boxes for the season.
  - ◇ **Brazil:** Volume shipped was approximately 1,070,446 boxes for a total of 4,170,057 boxes for the season.
  - ◇ **Ecuador:** Volume shipped was approximately 20,816 boxes for a total of 20,816 boxes for the season.
- **FUTURE VOLUMES:** **Overall mango volume shipped from week 39 (9/26/2020) to week 49 (12/5/2020) is expected to be 1% lower year-over-year, with arrivals expected from week 40 to 50.** Mexico volume for the season is projected to be about 2% lower YOY. Volume from Brazil is projected to be about 14% higher YOY. Volume from Ecuador is projected to be about 1% lower YOY. See page 2 for total and weekly volumes, and pages 4, 7 and 10 for individual country volumes.

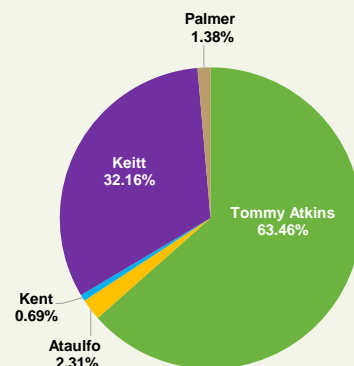

**Please note:** U.S. entry ports report incoming volume on different schedules; some report daily and some weekly. This causes discrepancies between the volume shipped from the source and the volume arrived at the U.S. entry ports in any given week.

Projections are adjusted throughout the season as new information is received.

# Mexico Crop Information

- The Mexican mango season began the fourth week of January and will run until approximately the last week of September. Volume projections are expected to be approximately **78** million boxes.
- Mexico's main varieties are Kent (29%), Tommy Atkins (29%), Ataulfo/Honey (23%), Keitt (15%), Haden (3%) and other (1%).

## Volume on week ending 9/19/2020

- Volume shipped from Mexico was approximately **500,551** boxes for a total of **78,101,320** boxes for the season.  
\* During the same week last year, volume shipped from Mexico was 969,451 boxes for a total of 79,460,989 boxes.

Price information is found on pages 12 – 13

**Dates are week-ending. For Shipping Projections and Volume Shipped from Source, 2-5 days from Mexico; and 2-3 weeks from Brazil and Ecuador for arrival at U.S. Ports.**

# Brazil Crop Information

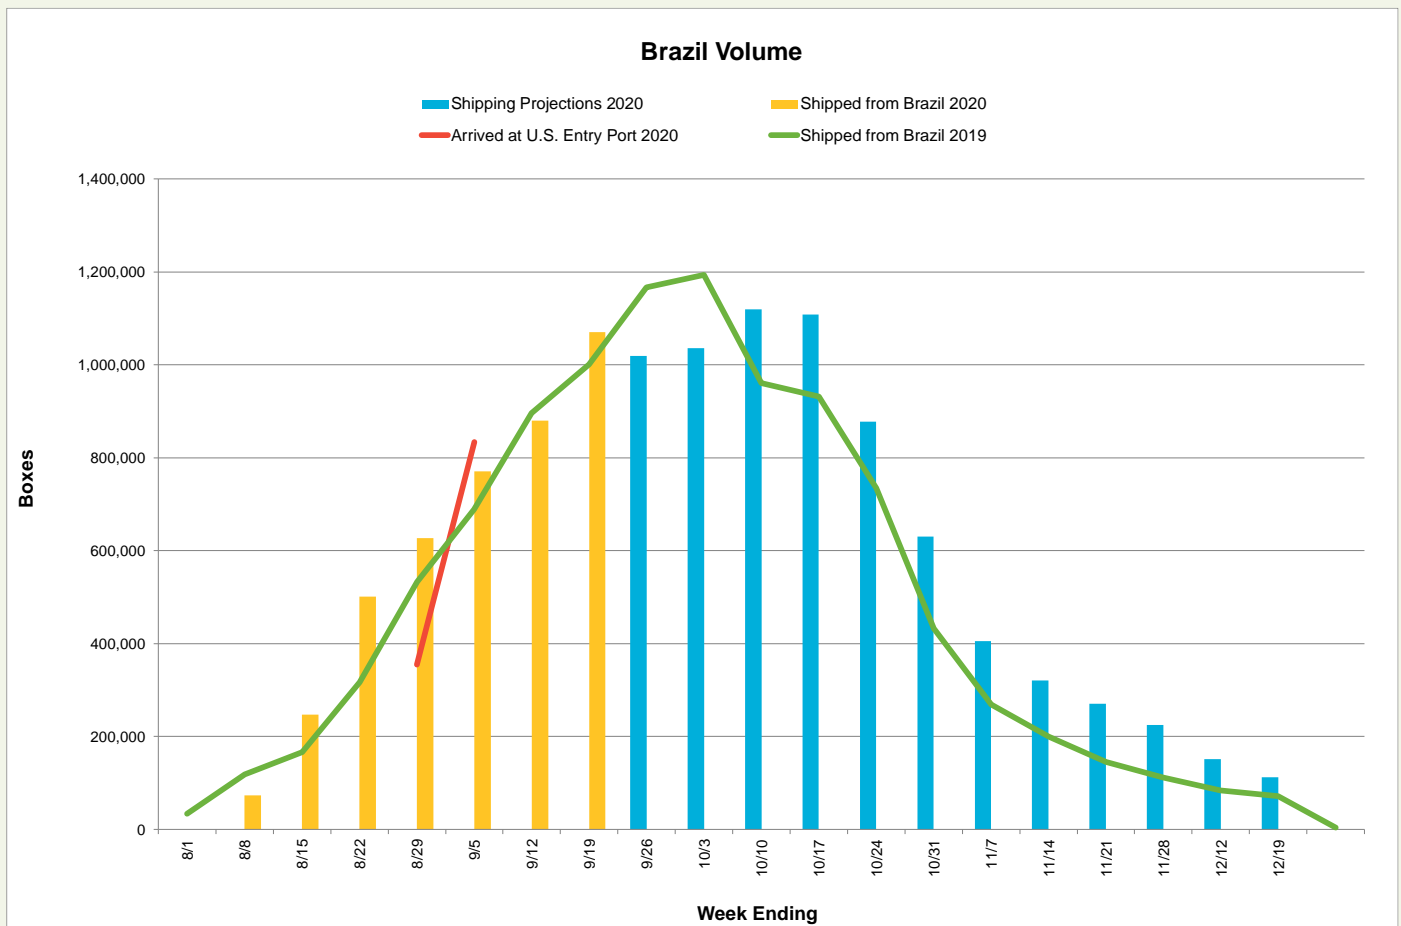

- The Brazilian mango season began the second week of August and is projected to run until the second week of December with a projection of approximately **11 million boxes**.
- Brazil's main varieties are: Tommy Atkins (90%), Palmer (4%), Kent (3%) and Other (3%).

## Volume on week ending 9/19/2020

- Volume shipped from Brazil was approximately **1,070,446** boxes for a total of **4,170,057** boxes for the season.
- \* During the same week last year, volume shipped from Brazil was 1,001,167 boxes for a total of 3,755,287 boxes.

*The vessel Northern Majestic coming from Brazil (Northern) did not dock on the expected due date of September 18. This has affected the mango supply for the industry, especially in the eastern half of the U.S. We will continue to monitor the situation and update you on any further development...*

Price information is found on pages 12 – 13

# Crop Report Tools and Resources

*The Mango Crop Report is updated weekly and can be found at [mango.org/crop](http://mango.org/crop).*

Note: the National Mango Board is working with organizations in the mango-producing countries to get projections of what will be shipped to the U.S. This document contains information from countries that are currently shipping or planning to ship in the near future to the U.S. and does not represent the entire year. The crop report document will be updated as we receive new information from each country. Other valuable tools include (these are links):

[Three-Year Trend by Country & Month](#)
