MANGO CROP REPORT

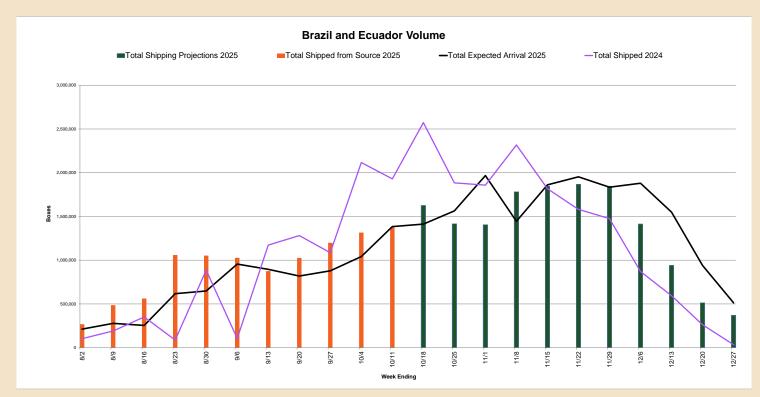

Updated October 16th, 2025

Please refresh your browser to upload the most current report

The National Mango Board (NMB) publishes the Mango Crop Report on a regular basis using information from industry organizations and other sources in an effort to provide the best available information on shipment projections, actual arrivals, variety and size availability, and other figures considered useful to the U.S. mango market. Although this information is updated regularly, changes can occur due to numerous factors at any given moment in time. Accordingly, the Mango Crop Report should only be used as a guide.

SUMMARY: Mexico (Irradiated), Brazil, and Ecuador

- ◆ EXPORTING REGIONS: Mexico (Irradiated), Brazil, and Ecuador are currently harvesting and/or packing.
- VARIETIES: There is currently ONE main mango variety shipped to the US market: Tommy Atkins (69%). There is also limited supply of Ataulfo, Keitt, Kent, Palmer, Haden and Madame Francis. See page 3.
- **SIZINC:** (Ataulfo/Honey: Large = size 16 and larger, Small = size 18 and smaller. Round mangos: Extra Large = 7 and larger, Large = sizes 8 and 10, Small = 12 and smaller.)
- ▶ **RECENT VOLUMES:** Total mango volume shipped on week ending 10/11/2025 was approximately 1,376,424 boxes.
 - ♦ Mexico (Irradiated): Volume shipped was approximately 12,849 boxes for a total of 9,453,984 boxes for the season.
 - ♦ Brazil: Volume shipped was approximately 851,046 boxes for a total of 7,141,234 boxes for the season.
 - ♦ Ecuador: Volume shipped was approximately 512,529 boxes for a total of 1,057,909 boxes for the season.
- ◆ FUTURE VOLUMES: Overall mango volume shipped from week 42 (10/18/2025) to week 46 (11/15/2025) is expected to be about 19% lower YOY, with arrivals expected from week 43 to 47. The 2025 Brazilian season is expected to be about 11% higher YOY. The 2025 Ecuador season is expected to be about 6% lower YOY.

<u>Please note:</u> U.S. entry ports report incoming volume on different schedules; some report daily and some weekly. This causes discrepancies between the volume shipped from the source and the volume arrived at the U.S. entry ports in any given week.

Prices shown represent averages of the high and low prices paid at the point of importation for that week. These are F.O.B. prices at points of production or points of entry for imports. They may include promotional allowances or other incentives. Brokerage fees paid by the shipper are included in the price reported.

Crop Report Tools and Resources

The Mango Crop Report is updated weekly and can be found at mango.org/crop

Note: the National Mango Board is working with organizations in the mango-producing countries to get projections of what will be shipped to the U.S. This document contains information from countries that are currently shipping or planning to ship in the near future to the U.S. and does not represent the entire year. The crop report document will be updated as we receive new information from each country. Other valuable tools include (these are links):

Three-Year Trend by Country & Month
