Updated July 3rd, 2025

Please refresh your browser to upload the most current report

The National Mango Board (NMB) publishes the Mango Crop Report on a regular basis using information from industry organizations and other sources in an effort to provide the best available information on shipment projections, actual arrivals, variety and size availability, and other figures considered useful to the U.S. mango market. Although this information is updated regularly, changes can occur due to numerous factors at any given moment in time. Accordingly, the Mango Crop Report should only be used as a guide.

SUMMARY: Mexico and Dominican Republic

- ♦ **EXPORTING REGIONS:** Mexico and Dominican Republic are currently harvesting and/or packing.

Projections are adjusted throughout the season as new information is received.
