

MANGO CROP REPORT

Updated July 11, 2024

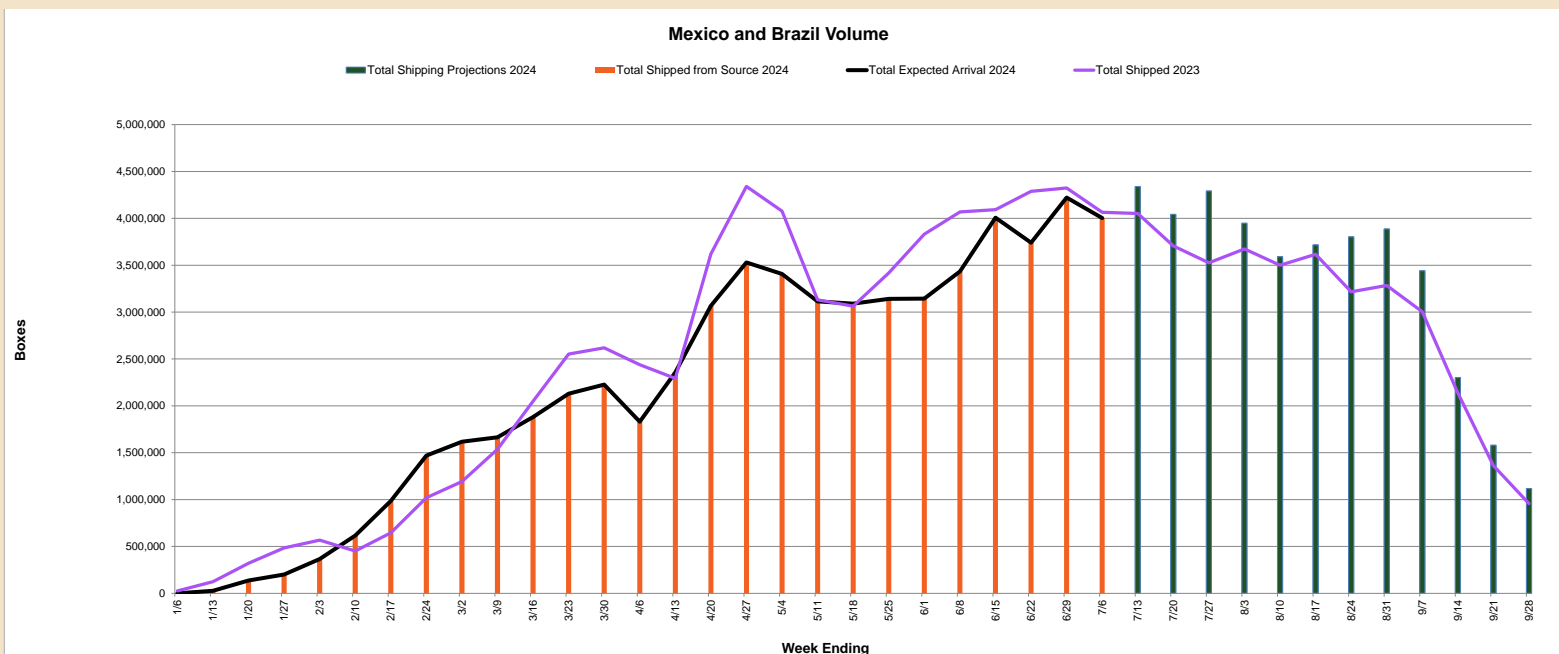

Please refresh your browser to upload the most current report

The National Mango Board (NMB) publishes the Mango Crop Report on a regular basis using information from industry organizations and other sources in an effort to provide the best available information on shipment projections, actual arrivals, variety and size availability, and other figures considered useful to the U.S. mango market. Although this information is updated regularly, changes can occur due to numerous factors at any given moment in time. Accordingly, the Mango Crop Report should only be used as a guide.

SUMMARY: Mexico and Brazil

- ◆ **EXPORTING REGION:** **Mexico** (Colima, Jalisco, Michoacán, Nayarit, South Sinaloa and North Sinaloa) are currently harvesting and/or packing. The **Brazilian** season will start on week 31 (8/3/2024). See pages 3-5 and 6-7 respectively for more details.
- ◆ **VARIETIES:** There are currently THREE main mango varieties shipped to the US market: Kent (55%), Tommy Atkins (20%) and Ataulfo/Honey (23%). There are also limited supply of Keitt, Manilla, Manila Rosa, Nam Doc Mai and Mallika. See page 3.
- ◆ **SIZING:** (Ataulfo/Honey: Large = size 16 and larger, Small = size 18 and smaller. Round mangos: Extra Large = 7 and larger, Large = sizes 8 and 10, Small = 12 and smaller.)
- ◆ **RECENT VOLUMES:** Total mango volume shipped on week ending **07/06/2024** was approximately **4,003,477 boxes**.
- ◇ **Mexico:** Volume shipped was approximately **4,003,477 boxes** for a total of **59,407,609 boxes** for the season.

FUTURE VOLUMES: Overall mango volume shipped from week 28 (07/13/2024) to week 33 (08/17/2024) is expected to be about 8% higher YOY, with arrivals expected from week 29 to 34. The 2024 Mexican season is expected to be about 1% lower YOY. The 2024 Brazilian season is expected to be about 4% higher YOY.

Please note: U.S. entry ports report incoming volume on different schedules; some report daily and some weekly. This causes discrepancies between the volume shipped from the source and the volume arrived at the U.S. entry ports in any given week.

Projections are adjusted throughout the season as new information is received.

Crop Report Tools and Resources

The Mango Crop Report is updated weekly and can be found at mango.org/crop

Note: the National Mango Board is working with organizations in the mango-producing countries to get projections of what will be shipped to the U.S. This document contains information from countries that are currently shipping or planning to ship in the near future to the U.S. and does not represent the entire year. The crop report document will be updated as we receive new information from each country. Other valuable tools include (these are links):

[Three-Year Trend by Country & Month](#)
